Child’s name: ____________________________________________

Head of the household’s name: ______________________________

Age : ____________________ Date : __________ / ______ / ______
1. Take the 2nd tablet.
2. Crush the tablet into powder.
3. Put the powder into the glass.
4. Add a little water.
5. Add sugar.

If your child is between 3 to 11 months, give them the medicine with a spoon.
If your child is between 12 months to 5 years, give them the medicine in a cup.

Reminder:
- Wash your hands
- Feed the child before giving the medication
- Give the medicines on Day 2 and Day 3
- Come back to the health center or see the community health worker next month

What you need:
