

4.2.4 Use commingled recycling containers (for cans, glass, aluminium cans, plastic containers) located in the kitchen area.

4.2.5 Avoid using disposable products (plastic cups, wipes, etc.) and replace them by durables.

4.3 Reduce Electricity Consumption

4.3.1 Switch off the lights whenever leaving the office or a common area (conference room, kitchen, corridors, etc.).

4.3.2 Switch off the computer and any other electrical equipment/devices before leaving the office.

4.3.3 Use a moderate thermostat setting in the office.

5. Environmental Safety in Drug Development

MMV's approach to drug development follows the guidelines set by stringent regulatory authorities. As such, MMV recognizes environmental safety as an important component of the risk assessment for new medicinal products and encourages all its development partners/future marketing authorization holders to fulfil stringent regulatory requirements related to environmental safety including conformity with (i) guidelines on the environmental risk assessment of medicinal products for human use as specified by the European Medicines Agency under article 8 (3) of Directive 2001 / 83 / EC (as amended) and/or (ii) the United States Code of Federal Regulations Title 21 Part 25 Environmental Impact Considerations.

6. Policy Review

This Policy will be subject to regular review by the ELT and approval by MMV's Chief Executive Officer and Head of Legal.

7. Communication

This Policy is available on MMV's intranet and on MMV's website.
